

# Alex Leybourne

## Junior Developer

### Profile

I am an experienced, capable and fresh-minded individual currently completing a 6 month Junior Dev Bootcamp at Coder Academy. I have previously worked in the areas of Social media, film and content creation but found myself falling in love with creating through code. I began through self-teaching using online resources. Outside of my study, I enjoy keeping up with all things tech and the rapidly expanding world it is. Playing social Basketball, taking care of my pets and travelling wherever I can.
